

## H2O Jet Equivalent Nozzles

Choice Waterjet Parts offers a full range of Abrasive Waterjet Cutting Nozzles that balance your need for price, performance, and component life. The right nozzle selection results in reduced consumable cost, higher machine uptime and improved finish quality on the parts coming off your waterjet. Starting with a Standard Life nozzle, Choice moves up through the value stream to an Ultra and Premium Life product, each with increasing performance and nozzle life. All H2O Jet Equivalent Nozzles are available with an optional Nozzle Splash Guard. And remember, ***if you can't find the parts you are looking for...we will!***

### Standard Life Nozzle

This carbide nozzle is considered a cost-optimized, yet quality entry level tool. This is the preferred tool for price sensitive shops that use their cutting equipment infrequently or for low volume test cuts. Most production operations will move to an Extended Life or Premium Life tool as the need for accuracy and nozzle cutting life increases.

### ***H2O Jet Equivalent Nozzles, Standard Life – Preferred tool for price sensitive shops using their cutting equipment infrequently***

Choice PN	H2O OEM Numbers	Description: I.D. x Length x O.D.	Price Breaks		
			Qty 1 - 5	Qty 6 - 11	Qty 12 - 23
060550001	-	Nozzle, Standard Life, .020 x 3" x .281	\$75.00	\$73.50	\$72.25
060550002	1000008-30-3	Nozzle, Standard Life, .030 x 3" x .281			
060550003	1000008-35-3	Nozzle, Standard Life, .035 x 3" x .281			
060550004	1000008-40-3	Nozzle, Standard Life, .040 x 3" x .281			
060550005	1000008-50-3	Nozzle, Standard Life, .050 x 3" x .281			
060550055	-	Nozzle, Standard Life, .055 x 3" x .281	\$85.00	\$82.50	\$80.00
0605500034ML	1000008-30-4	Nozzle, Standard Life, .030 x 4" x .281			
060550035XL	1000008-35-4	Nozzle, Standard Life, .035 x 4" x .281			
0605500044ML	1000008-40-4	Nozzle, Standard Life, .040 x 4" x .281			
060550005XL	-	Nozzle, Standard Life, .050 x 4" x .281			

## H2O Jet Equivalent Nozzles

### Ultra Life Nozzle

The Ultra Life Nozzle combines a higher precision manufacturing process with a special anodized coating. These nozzles are considered the ideal balance between price and performance. While the actual life of a nozzle is dependent upon many variables such as abrasive type, feed rates, on/off cycle rate, etc., Ultra Life Nozzles offer an extended life of up to 20% over Standard Life Nozzles. This is the preferred tool for shops that run high production looking for the best value.

060550020LL	-	Nozzle, Ultra Life, .020 x 3" x .281	\$119.00
060550030LL	1000013-30-3	Nozzle, Ultra Life, .030 x 3" x .281	
060550040LL	1000013-40-3	Nozzle, Ultra Life, .040 x 3" x .281	
060550030LLXL	1000013-30-4	Nozzle, Ultra Life, .030 x 4" x .281	
060550040LLXL	1000013-40-4	Nozzle, Ultra Life, .040 x 4" x .281	

### Premium Life Nozzle

Premium Life Nozzles provide the highest cut accuracy and quality over the life of the nozzle. After the optimized grade nozzle is formed, all surfaces are ground to a high finish level. While the actual life of a nozzle is dependent upon many variables such as abrasive type, feed rates, on/off cycle rate, etc., the Premium Life Nozzles offers an additional life extension of up to 30%.

### *H2O Jet Equivalent Nozzles, Premium Life – Used by high performance shops that demand accuracy and extended life*

**Selecting your Choice Waterjet Parts, H2O Jet Equivalent Waterjet Nozzle**

Choice offers a full range of Nozzles that meet or exceed your nozzle life expectations. To select your H2O Jet OEM Equivalent Nozzle/Focusing Tube:

1. **Choose your Performance Standard:** Consider your application and performance requirement and choose your nozzle type (Standard Life, Ultra Life, Premium Life).
2. **Choose your nozzle I.D.:** After you have selected the appropriate nozzle performance required, choose the inside diameter (I.D.) you require relative to the orifice size and type you are using. Smaller I.D.'s provide greater precision, reduced taper on your cuts and a higher cut finish quality. A larger I.D. allows for greater water and abrasive flow and provides for a faster cut. A general rule of thumb is to start with a nozzle I.D. that is three times larger than the orifice being used.
3. **Choose your Nozzle Length:** The 4" nozzle has become the industry standard due to the accuracy and extended life realized over shorter nozzle lengths. The clearance distance between the cutting head and material being cut may dictate optimum nozzle length.

**Blast Disc/Nozzle Splash Guard**

Reduce splash back during piercing and cutting with a Blast Disc / Nozzle Splash Guard. The guard can be used with any H2O Nozzle.
